CAREER OBJECTIVE

Fourth-year Bachelor of Science in Information Technology student at Systems Technology Institute (STI), expected to graduate March 2027, focused on becoming a full-stack web developer. Experienced in designing and shipping complete web applications end-to-end — from database and backend logic to responsive, production-ready interfaces. Seeking an internship/OJT opportunity to apply hands-on project experience in a real development team, contribute to production code, and continue growing as a professional software developer.

KEY STRENGTHS

- Full-Stack Development — Comfortable working across the entire stack, from database schema design to responsive frontend UI
- Fast Learner — Picks up new frameworks and tools quickly through independent, project-driven learning
- Detail-Oriented — Writes clean, maintainable code and carefully debugs issues across the stack
- Adaptable — Has shipped projects across multiple stacks (PHP/MySQL, Next.js/tRPC, plain JS/Firebase)
- Self-Motivated — Builds and completes full personal projects independently, without external direction
- Problem Solver — Designs practical solutions to real operational problems (e.g. booking systems, inventory tracking)

TECHNICAL SKILLS

Languages:

JavaScript, TypeScript, PHP, HTML5, CSS3

Frontend:

React, Next.js, Tailwind CSS

Backend:

Node.js, tRPC, Laravel, REST APIs

Database:

PostgreSQL, MySQL, Prisma ORM, Firebase

Tools & Other:

Git/GitHub, Chart.js, Vite, Netlify deployment

PROJECTS

Full-Stack E-Commerce Platform

tikshop-ecommerce-app.netlify.app

Next.js, TypeScript, tRPC, Prisma, PostgreSQL, Tailwind CSS

- Built a full-stack e-commerce platform end-to-end, from database schema to deployment
- Implemented real-time product browsing, secure checkout, and role-based admin analytics

Barbershop Booking System

7as-barberstudio.netlify.app

HTML, CSS, JavaScript, Node.js, Tailwind CSS, Firebase

- Developed a real-time appointment booking platform for customers and a staff-facing admin dashboard
- Built slot, service, and booking management features backed by Firebase

Inventory & POS System

inventory-pos.free.nf

PHP, MySQL, JavaScript, Chart.js, CSS3

- Built a point-of-sale and inventory management system for small retail businesses
- Implemented real-time stock deduction, role-based staff access, and live sales analytics dashboards

CODM Esports Community Platform

ventrix-community.netlify.app

React, Node.js, REST API

- Built a centralized esports community hub connecting players, teams, and fans
- Implemented live team rosters, tournament brackets, match schedules, and announcements

EDUCATION

Systems Technology Institute (STI) — Taguig City, Philippines

Expected March 2027

Bachelor of Science in Information Technology — 4th Year
